sketches of Petrozavodsk (61°49'N, 34°20'E)	25X1
Sketch 1: Survey of areas covered by Sketches 2 through 4.	
Sketch 2: The center of Petrozavodsk.	
Sketch 3: The area of the main railway station.	
Sketch 4: The area around the airfield.	
Sketch 5: The center of Petrozavodsk, including the new harbor south of the town.	25X1
Sketch 6: The fuel dump about 2.5 km northeast of the main railway station.	

Comment. The object shown as item 24 in Sketch 2, a railroad-car repair shop, and as item 10 in Sketch 5, a wood-gas locomotive factory, seems to be the same as that identified as an aircraft accessory plant. In addition to wood-gas locomotives, wings and tail assemblies for twin-engine aircraft reportedly are manufactured there. The exact location of this plant is clarified by Sketches 2 and 5.

25X1

25X1

1. Comment. this tower is 40-50 m high and belongs to the MVD station, item 12 on Sketch 5. the transmitter and power unit of this station were located in railway cars standing in this area.

2. [redacted] Comment. [redacted] this camp was not in operation after 1949. 25X1

3. [redacted] Comment. The name of this station was [redacted] Kukovka, once as Gulikovka. 25X1

4. [redacted] Comment. [redacted] this power plant no longer operates. 25X1

5. [redacted] Comment. [redacted] there were only four fuel tanks in this dump. 25X1

6. [redacted] Comment. Concerning the PW camps, it is interesting to note that Sketches 3 and 6 place PW Lake Camp above the seaplane base, while Sketch 5 reverses the positions. This same camp apparently is called 7120-7 in Sketch 6, while it is called 7120-D in Sketch 5. The camp called Severnaya Tochka in Sketch 2 seems to be the same as that known as Forest Camp, or 7120-B, in Sketch 5. [redacted] the Lake Camp was some distance above the seaplane base; camp 7120-B is known [redacted] as 7120-4; and [redacted] uses the name Severnaya Tochka to designate a torpedo proving ground. 25X1

Fuel Dump near Petrozavodsk

NOT TO SCALE

Legend.

1. Railway station
2. Seaplane base
3. PW camp 7120-7
4. Fuel dump, 250x250 meters, consisting of 12 horizontal tanks with a capacity of about 50 tons each; they are partially buried, with two distribution points, two pipe lines 25cm in diameter and 1,500 meters long, leading to the railway station, a wooden administration building, 10x5 meters, and several mobile pumps.⁵ The fuel arrived by truck day and night, and was issued to military and civil agencies. Work force: About 30 women. As far as is known, fuel is not received or issued on the side toward the lake.
